

Document Version: 4.2	Effective Date: August 2026	Classification: Internal / Confidential
Department: IT & Cybersecurity	Approved By: Chief Information Officer	Target Audience: All Employees & Contractors

1. Purpose and Scope

This document outlines the corporate IT policies, cybersecurity standards, acceptable use guidelines, and infrastructure operating procedures for all employees, contractors, and third-party vendors at **SocialEagle**. Compliance with these policies is mandatory to protect company intellectual property, customer data, and digital assets.

2. Acceptable Use Policy (AUP)

SocialEagle technology resources—including hardware, email, internet access, software licenses, and internal databases—are provided primarily for business activities.

- **Device Usage:** Corporate devices must be used strictly in accordance with security guidelines. Unapproved software installation is prohibited.
- **Data Protection:** Sensitive client data, source code, and internal communications must never be exported or stored on personal, unencrypted drives.
- **Internet & Network Access:** Accessing illegal, malicious, or non-work-related high-bandwidth content on corporate networks is strictly forbidden.

3. Identity, Access Management & Authentication

Access to SocialEagle systems follows the Principle of Least Privilege (PoLP) and Role-Based Access Control (RBAC).

Security Domain	Requirement Standard	Enforcement Level
Password Complexity	Minimum 14 characters, incorporating upper, lower, numeric, and special characters.	HIGH
Multi-Factor Authentication (MFA)	Mandatory hardware key or authenticator app for all corporate accounts.	HIGH
Session Timeout	Automated lock after 15 minutes of inactivity on workstations and web sessions.	MEDIUM
Password Rotation	Rotated every 90 days or immediately upon suspected compromise.	MEDIUM

4. Device Management & Remote Work Security

To ensure seamless and secure remote work operations, the following protocols must be maintained:

- 1. Mobile Device Management (MDM):** All laptops and smartphones accessing corporate systems must be enrolled in the SocialEagle MDM agent.
- 2. VPN Requirement:** Employees connecting from external networks must utilize the corporate VPN with full-tunnel encryption.
- 3. Physical Security:** Devices must not be left unattended in public spaces. Screen locks must be engaged when leaving the desk.
- 4. Encryption:** Full-disk encryption (BitLocker / FileVault) is enforced across all endpoints.

CRITICAL: Incident Reporting Protocol

If a corporate device is lost, stolen, or compromised, the employee must report it to the IT Security Desk within **1 hour** at security@socialeagle.com or via the emergency hotline.

5. Data Classification & Handling

Information assets are categorized into three levels:

- **Public:** Marketing collateral, published blog posts, public product announcements.
- **Internal:** Internal communications, project roadmaps, employee directories.
- **Confidential / Restricted:** Customer PII, financial records, API keys, source code, and architectural blueprints. Access restricted to authorized personnel only.

6. Incident Response & System Availability

The SocialEagle IT Operations team maintains a 24/7 monitoring service for infrastructure integrity, incident escalation, and service availability.

Severity Level	Description	Target Response Time
Severity 1 (P1)	Critical outage affecting primary core services or security breach.	< 15 Minutes
Severity 2 (P2)	Major functionality impaired affecting multiple teams.	< 1 Hour
Severity 3 (P3)	Minor issue or single user disruption with workarounds.	< 4 Hours

7. Policy Compliance and Review

This policy manual is reviewed annually by the IT Steering Committee and Information Security Directorate. Failure to adhere to corporate IT policies may lead to disciplinary action, up to and including termination of employment and potential legal action.
